EDUCATION

Ahmedabad Institute Of Technology
Computer Engineering B.E
CGPA: 8.20

Ahmedabad, Gujarat
2021 - Present

EXPERIENCE

EY(Ernst & Young) | Project Intern Pune (Remote) | Dec, 2024 - Present
This internship lasts for three months. Currently, I am working with Groovy Script. I first learned Groovy before starting my tasks. Additionally, I will be working on an Oracle EPM project that focuses on finance. For the backend, we will be using Groovy and MySQL.

Grownited Pvt. Ltd. | Spring (core, mvc, boot) Ahmedabad | Jun, 2024 - July, 2024
This is a 15 days internship. In this internship, a business logic/E-commerce website was developed using Spring MVC and Spring Boot for the backend, and HTML, Tailwind CSS, and JSP for the frontend. Also, I learned spring security, hibernate, microservices and swagger.

Infolabz Pvt. Ltd. | React Js. Ahmedabad (Remote) | Jun, 2024 - July, 2024
This is a 15-day internship. During this internship, I performed various tasks such as fetching API data using JavaScript and React Js, and I worked with real-time API data.

SKILLS

Programming Languages: C, Java, HTML/CSS, JavaScript, Python (Basic), Groovy Script
Libraries/Frameworks: Spring Framework(core mvc boot), Advanced Java(Servlet & JSP), React js., Hibernate, Tailwind CSS, Android (Java), Microservices
Tools / Platforms: Git/GitHub, Eclipse/STS, Vs Code, Android Studio, Postman, Swagger
Databases: MySql, ORACLE

PROJECTS / OPEN-SOURCE

Hospital Management System | Link Core Java, JDBC
In this project, I have created a database named 'hospital' consisting of three tables: Patients, Doctors, and Appointments. This is a freelance project I created for a friend. I have created a Figma template for our project, which will help us to understand it easily.

Excel Clone | Link HTML/CSS, Tailwind CSS, JavaScript
This project is an Excel clone using HTML/CSS, Tailwind CSS, and jQuery. I learned some more things about JavaScript, logical thinking, and problem-solving skills from this project.

Weather Application | Link HTML/CSS, JSP, Servlet
I have used the CurrentWeatherAPI to fetch data using Java Networking. Developed frontend using HTML/CSS so we can put data whatever city you want to search and that data is fetched by JavaServlet and gives current weather data as a response on JavaServerPage.

eCommerce Website(Full Stack Project) | Link HTML/CSS, Tailwind CSS, JSP, Spring MVC
Currently, I am working on a full-stack website. The backend is built using the Java framework Spring MVC, and the frontend uses HTML, CSS (including Tailwind CSS), and JSP. I have personally applied all the business logic on this website like forget password, add to cart, admin dash board etc...

Zomato Backend Project | Link Spring Boot, Hibernate, RESTful API
This project build in spring boot framework, spring security, RESTful API and hibernate for auto database configuration. In this project, I used payment service, security configuration, email sending, otp generate etc.. .

StudentProgressReport(Full Stack Project) | Link

React.js, Spring Boot, Hibernate, JWT Token

This is my first Full Stack Project. In this project, I implement swagger for apis, also react js for front-end and for backend spring boot framework use. From this project , I learn how to integrate the front-end and backend.
